Subject: Spot Report #28
Attachments: Spot Report #28 8-29-2017 DR 4332.docx; Spot Report #28 8-29-2017 DR 4332.pdf

BOTTOM LINE UP FRONT:

- Events overnight have triggered CIR # 4 Critical Information Requirement:
- Flash Flood Emergency for Beaumont/Port Arthur, TX and surrounding areas.

SITUATION:

- Extremely heavy rainfall across the Beaumont/Port Arthur area is creating a potentially life threatening flash flood situation. 24 hour rainfall totals as of early Wednesday morning are in excess of 20" across areas from Winnie, TX eastward to Nederland and Port Arthur, including southern portions of Beaumont. Rainfall over the last six hours has exceeded 12" over Nederland as the heaviest precipitation moved through. The heaviest storms are slowly shifting eastward but widespread moderate rainfall will continue to produce additional amounts of 3-6 inches of rain through daybreak. A Flash Flood Emergency is in effect for this area through 4:15 am CDT.

ACTIONS/FOLLOW UP:

- R6 RRCC SAS will continue to monitor and report as necessary.

SOURCE OF INFORMATION:

- National Weather Service

PREPARED BY:

- FEMA Region 6 RRCC Documentation Unit, 940-898-5159
